Innovación en nuestro ADN

La investigación para la mejora continua de productos, sistemas de instalación, procesos y, en definitiva, de todos los aspectos de nuestras áreas de trabajo, es un factor imprescindible para competir en un mundo globalizado.

El espíritu innovador está presente en todos nuestros departamentos.

Research to continuously improve products, installation systems, processes and, in short, all aspects of our work, are crucial factors for competing in a globalised world.

The innovative spirit is present in all our departments.

Colorker®

Industria 4.0

Colorker Group es pionera en el sector cerámico en la implantación de un sistema de industria 4.0. Nos encontramos inmersos en el Proyecto CEBRA (CEramic BRAin) junto con el Instituto de Tecnología Cerámica (ITC) gracias a la financiación pública cedida por el IVACE.

El objetivo del proyecto es crear un sistema que permita convertir nuestra planta de producción cerámica tradicional en una industria 4.0 de producción inteligente.

Para ello, se ha desarrollado un software de gestión MOM (Manufacturing Operations Management) junto con habilitadores digitales como el Big Data, IoT (Internet of Things) o Machine Learning, que integrará todos los sistemas de la fábrica, consolidando así en un único punto todos los datos relevantes.

Con industria 4.0 fomentamos la Inteligencia Colaborativa, recabando y analizando datos de una mejor manera y transformándolos en información precisa, aplicable y en tiempo real, lo que permite decisiones comerciales más acertadas y rápidas.

Con este nuevo concepto de industria somos cada vez más capaces, no solo de resolver los problemas con mayor rapidez, sino también de optimizar la innovación. Algo que sin duda contribuye a mejorar la productividad y la calidad, ayudando con ello a satisfacer la demanda de forma más precisa y rentable.

Colorker Group is at the forefront in the ceramic sector in the implementation of an industry 4.0 system. We are currently immersed in Project CEBRA (CEramic BRAin) in collaboration with the Institute of Ceramic Technology (ITC) thanks to public funding granted by the Valencian Institute of Business Competitiveness (IVACE).

The aim of the project is to create a system that will enable us to transform our traditional ceramic production plant into an industry 4.0 smart manufacturing facility.

To achieve this, MOM software has been developed (Manufacturing Operations Management) together with digital enabling tools such as Big Data, IoT (Internet of Things) or Machine Learning, which will integrate all the systems in the factory, consolidating all relevant data in one location.

With industry 4.0 we promote Collaborative Intelligence, gathering and analysing data more optimally and transforming it into accurate, applicable information in real time, which facilitates better, faster commercial decision-making.

This new industry concept makes us increasingly capable, not just of solving problems faster, but also of optimising innovation. Without a doubt, this contributes to enhanced productivity and quality and helps meet demand more precisely and profitably.

PRODUCTO INTELIGENTE

Obtenemos un producto final de máxima calidad y garantía.

We achieve end products of the highest quality.

Fieles a la Industria 4.0, cada pieza dispone de su propio código QR. Gracias a ello, podemos conocer en cualquier momento los datos de fabricación de cada una de las piezas, consiguiendo una total trazabilidad, además de una optimización y mejora continua de los procesos.

True to the Industry 4.0, each part has its own QR code. As a result of this, we can find out the manufacturing data of each of the parts at any time, which provides us with comprehensive traceability and enables the processes to be continually optimised and improved.

Reduce el tiempo de fabricación y comercialización de los nuevos productos, lo que se conoce como Time to Market.

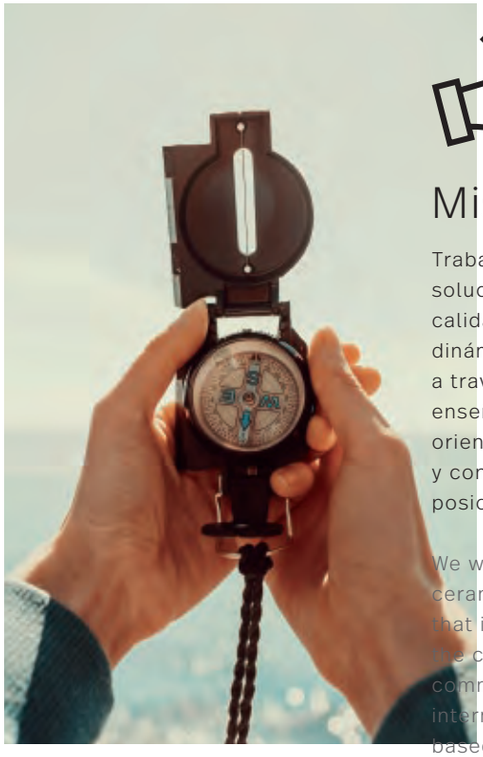

We save on product manufacturing and commercialisation time, i.e. Time to Market.

Cultura de empresa

COLORKER se distingue por ser un lugar de trabajo en el que las personas desarrollan su actividad en un ambiente cercano y profesional, comprometido y dinámico, exigente y colaborativo.

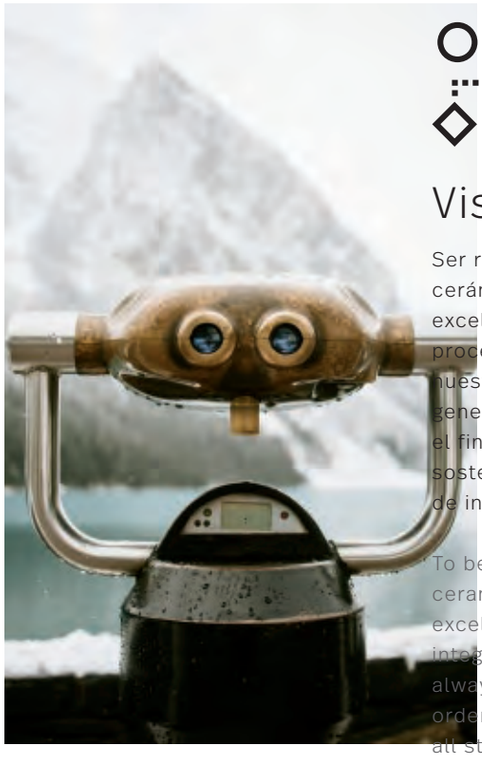

COLORKER stands out as a workplace where people develop their activity in a tight-knit and professional atmosphere, one that is committed and dynamic, demanding and collaborative.

Misión

Trabajamos para ofrecer soluciones cerámicas de calidad, de una forma dinámica y próxima al cliente, a través de diferentes enseñas comerciales, con orientación internacional y con dos premisas, posicionamiento y valor.

We work to offer quality ceramic solutions, in a way that is dynamic and close to the client, through different commercial brands, with an international outlook and based on two premises: positioning and value.

Visión

Ser referente en el sector cerámico a través de la excelencia de todos los procesos que integran nuestra cadena de trabajo, generando siempre valor con el fin de satisfacer de forma sostenible a todos los grupos de interés.

To be a benchmark in the ceramic sector through excellence in all processes integrating our work chain, always generating value in order to sustainably cater for all stakeholders.

Inside Colorker

VALORES

Calidad integral en la orientación al cliente

Total quality in customer focus

Ética, profesionalidad y trabajo en equipo

Ethics, professionalism and teamwork

Mejora continua y alto nivel de exigencia

Continuous improvement and high standards

Una mirada diferente

En 1987 Colorker nacía de la mano de un grupo de emprendedores provenientes de la industria cerámica que compartía un mismo propósito: crear productos cerámicos que despertaran emociones. Años después, Colorker ha evolucionado y expandido su visión, convirtiéndose en Colorker Group, un grupo empresarial que actualmente apuesta por mantenerse a la vanguardia de la creatividad y la tecnología.

Colorker was founded in 1987 by a group of ceramic industry entrepreneurs sharing a common goal: to create ceramic products capable of evoking emotions. Years later, Colorker has evolved and expanded its vision, becoming the Colorker Group, a business group that is currently committed to staying at the forefront of creativity and technology.

NUESTROS 3 PILARES

Generamos productos que inspiran y desarrollan el potencial de otros proyectos.

We generate products that inspire and develop other projects' potential.

Tenemos siempre un pie en el futuro. En nuestros procesos, tecnología, cultura de empresa y forma de entender la industria.

We always have one foot in the future. Our processes feature technology, business culture and the way of understanding the industry.

Conectamos con empresas y talentos. Establecemos alianzas y sinergias. Escuchamos activamente e interiorizamos la visión de cada persona.

We connect with companies and talent. We establish alliances and synergies. We actively listen and we take in each person's vision.

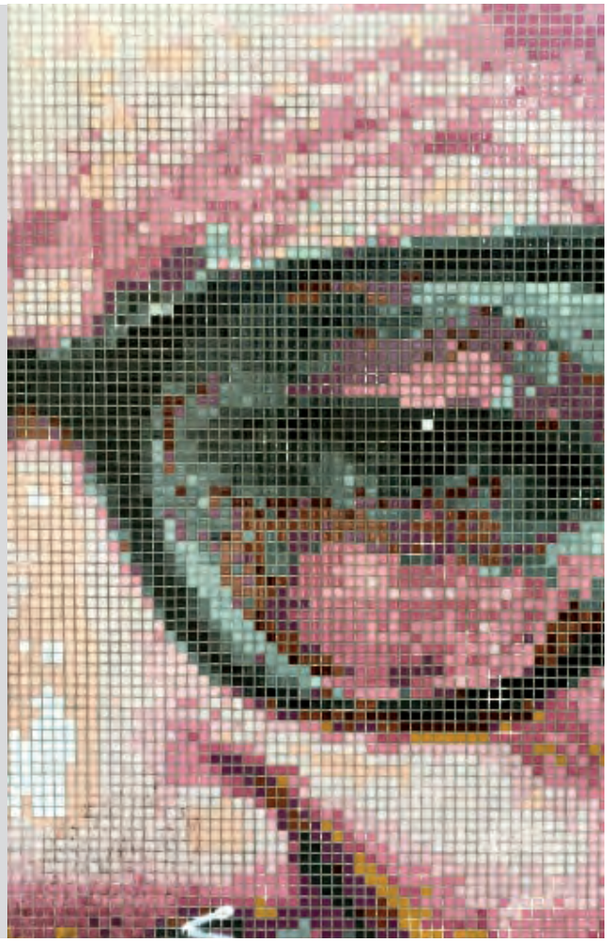

Creatividad e innovación

El futuro cerámico no es qué, es cómo. Por eso apostamos por la innovación en nuestros sistemas de instalación, procesos y áreas de trabajo para alcanzar los mayores estándares de calidad.
Fruto de este afán continuo de mejora, Colorker Group expande sus límites. Además de Colorker, cuenta con su marca ZYX, una nueva puerta a la innovación y siempre con la creatividad como estandarte.

The future of ceramics is not what, it is how. That is why we are committed to innovation in our installation systems, processes and work areas to attain the highest quality standards.
As a result of this constant desire for improvement, Colorker Group broadens its boundaries. Besides Colorker, you can find its brand ZYX, a new gateway to innovation with creativity as its touchstone.

COLORKER™ GROUP

Colorker® ZYX®

Un espacio para nuevas ideas

Colorker Group es en la actualidad una puerta abierta a la experimentación. Poseemos una mente joven pero experta. Sin renunciar a nuestro pasado, pero con una experiencia acumulada, nos reinventamos constantemente con una fuerte vocación internacional.

The Colorker Group is currently an open door for experimentation. Our brain power is young but expert. Without turning our backs on our past, but rather with the benefit of our accumulated experience, we are reinventing ourselves constantly with a strong international vocation.

Somos adictos a la naturaleza

Estamos comprometidos con nuestro entorno y el futuro de nuestro planeta.
Es por ello, que la reducción del impacto medioambiental de nuestra actividad va más allá de nuestras propias instalaciones, diseñando productos que contribuyen a reducir el consumo energético.

Estas son algunas de las áreas en las que incide nuestro Plan de Gestión Ambiental, el cual nos ha permitido obtener las diferentes certificaciones medioambientales que convierten a Colorker Group en una empresa respetuosa con el medioambiente, que trabaja para reducir al mínimo su impronta ambiental.

We are committed to our environment and the future of our planet.
This is why reducing the environmental impact of our activity goes beyond our own walls into designing products that contribute to reducing energy consumption.

These are some of the areas covered by our Environmental Management Plan, which has enabled us to obtain the different environmental certifications that stand to the Colorker Group as an environmentally-friendly business working to reduce its environmental impact to the minimum.

USO DEL CATÁLOGO

USE OF THE CATALOGUE

La reproducción de los colores es aproximada debido a los sistemas de impresión.
Los códigos de precios y las referencias deben verificarse ya que pueden haber errores tipográficos.
El fabricante se reserva el derecho de modificar las características del packing según las condiciones del pedido.

Given the printing systems in use, the colours reproduced herein are roughly equivalent to actual ones.
Price code and product codes should be checked since there be typographical errors.
The manufacturer reserves the right to modify the characteristics as per the terms and conditions of the order.

Ejemplo de página
Example of page

Variación cromática
Shade variation

V1 Uniforme *Uniform*

V2 Variación leve *Slight variation*

V3 Variación media *Moderate variation*

V4 Variación alta *Strong variation*

¿QUÉ SIGNIFICA V1, V2, V3, V4?
Indica el nivel de destonificación de la colección. Indica la variedad de tonalidades –entendida como riqueza de colores– que una misma pieza puede experimentar. Se establece una escala del 1 al 4, en la que 1 (V1) indica poca o nula destonificación (uniforme); 2 (V2), una destonificación leve; 3 (V3) destonificación media; y 4 (V4), destonificación alta.

WHAT DOES V1, V2, V3, V4 MEAN?
Indicates the degree of shade variation in the collectiozn. Indicates the variety of tones –understood as the richness of colours– that one same piece can have. The scale goes from 1 to 4, in which 1 (V1) indicates little or no shade variation (even); 2 (V2), a slide shade variation; 3 (V3) medium shade variation; and, 4 (V4) high shade variation.

Variación gráfica
Graphic variation

G1 Uniforme *Uniform*

G2 Variación leve *Slight variation*

G3 Variación media *Moderate variation*

G4 Variación alta *Strong variation*

¿QUÉ SIGNIFICA G1, G2, G3, G4?
Indica el nivel de variación gráfica –entendida como diversidad de diseños– dentro de la misma colección y puede diferir, asimismo, según el formato. Se establece una escala del 1 al 4, en la que 1 (G1) indica poca o nula variedad gráfica (uniforme); 2 (G2), una variedad leve; 3 (G3) variedad media; y 4 (G4), variedad alta.

WHAT DOES G1, G2, G3, G4 MEAN?
Indicates the degree of graphic variation –understood as the diversity of designs– within the same collection and it can also vary depending on the format. The scale goes from 1 to 4, where 1 (G1) indicates little or no graphic variation (even); 2 (G2), slight graphic variation; 3 (G3) medium graphic variation; and, 4 (G4) high graphic variation.

CONSEJOS DE COLOCACIÓN

ADVISE OF LAYING

PARA FORMATO RECTÁNGULAR

Para la correcta colocación de los productos cerámicos, es necesario que tanto las superfícies horizontales como verticales, estén completamente planas y sin presencia de residuos.
Como material de agarre se utilizarán cementos cola especiales para porcelánicos, aplicándose doble encolado en pieza y soporte, extendiéndose con llana dentada.
Por las características rectangulares de las piezas se aconsejan las colocaciones siguientes:

FOR RECTANGULAR FORMAT

In order to correctly lay the ceramic products, it is necessary to have horizonttal and vertical surfaces completely flat and without any residues.
For porcelain materials, special quick-drying must be used as the adhering material, using double spread gluing on both the piece and the stand, and applying it with a square notch trowel.
Due to the rectangular nature of the pieces, we recommend the fallowing laying process:

PARA LAS GRANILLAS PULIDAS:

COLOCACIÓN:

1. Antes de la colocación, extender varias piezas para obtener una superficies mínima de unos 9 m2, y comprobar el efecto estético final, usando piezas mezcladas de varias cajas.
2. No marcar con lápiz ni con rotulador la superficie de las balosas.
3. Para el corte del material se recomiendan máquinas eléctricas con discos para porcelánicos, refrigerado por agua para los cortes rectos y radial para los curvos.
4. Mientras dure la obra, proteger la superficie con cualquier medio adecuado para garantizar el brillo y evitar que se raye o deteriore.
5. Usar un cemento cola específico.
6. Para colocar e igualar las piezas usar una maza de goma blanca, nunca negra o gris.
7. En los rectificados se recomienda dejar una junta mínima de 1.5 mm.
8. Una vez rejuntado, limpiar la superficie inmediatamente con una esponja húmeda antes del endurecimiento definitivo del material de rejuntar.

LIMPIEZA:
Limpiar con un paño húmedo y alcohol de quemar las piezas después de su colocación.
Para su mantenimiento se recomienda usar una mopa seca sin aplicar productos cerosos.

FOR POLISHED FINISHES:
PLACEMENT:

1. *Before placement, extend several pieces using different and mixed boxes to obtain a minimum surface of 9 sq. m, in order check the final aesthetic effect.*
2. *Do not mark the surface of the tiles with pencil or pen.*
3. *To cut the material watercooled electrical machines with disks for porcelain are recommended.*
4. *During the work, cover the surface with any appropiate means to protect the brightness and to avoid scratching or damage.*
5. *Use a specific adhesives for porcelain tiles.*
6. *To place and match the pieces use a white rubber hammer, never black or grey.*
7. *For rectified tiles a minimum joint of 1.5 mm is recommended.*
8. *After grouting, clean the surface immediately with a damp soponge before definitive hardening of grouting material.*

CLEANING:
After placement clean with a damp cloth and denatured alcohol. For maintenance, it is recommended to use a dry dust cloth without applying any waxy products.

PARA DUPLO

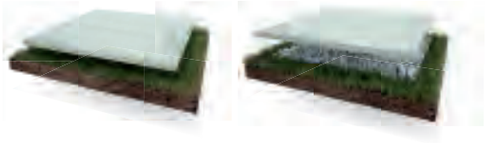

SOBRE HIERBA

A. Preparación del suelo

Coloca las piezas directamente sobre una superfície de hierba uniforme con el fin de que dejen su huella sobre la misma.
Retirar las piezas y escavar la hierba aplastada una profundidad de 5-6 cm.
Rellenar los huecos con una capa de granilla fina de unos 3 cm de profundidad.

B. Colocación de las piezas de duplo

Colocar las piezas sobre el lecho de grava de manera que queden ligeramente encastradas en el terreno.
Compactar y nivelar con listón y martillo de goma.

ON GRASS
A. Preparing the ground
Place the tiles directly onto a uniform grass surface in order for them to make an imprint.
Remove the tiles and dig into the grass to a depth of 5-6 cm.
Fill the holes with a fine layer of gravel about 3cm deep.
B. Fitting duplo tiles
Fit the tiles lightly on the bed of gravel in such a way that they are lightly fitted into the ground.
Compress and level out with a bar and rubber hammer.

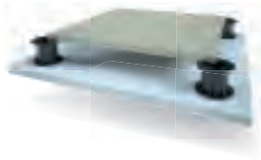

SOBRE PLOTS

A. Preparar la estructura de soportes

Disponer los soportes regulables sobre la superficie de colocación.
Ubicarlos de modo que cada uno se sitúe en los vértices de las piezas, tal y como se muestra en la imagen.

B. Colocación de las piezas de duplo

Colocar las piezas sobre los soportes y nivelarlas usando el sistema de regulación de los mismos.

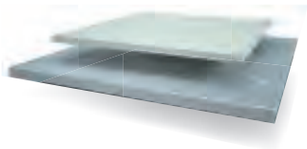

ON PLOTS
A. Preparing the support structure
Have the adjustable supports on the fitting surface.
Fit them in such a way that each one is placed on the vertexes of the pieces, as shown in the image.
B. Fitting duplo tiles
Place the tiles on the supports and level them out using the adjustment system of the supports.

SOBRE CEMENTO

A. Colocación de las piezas duplo

Colocar las piezas con un adhesivo adecuado para porcelánico, aplicado siguiendo las instrucciones del fabricante. Para conseguir una superficie uniforme y compacta, se aconseja utilizar la técnica de doble encolado, sobre todo en pavimentaciones que vayan a ser sometidas a altas cargas. Mantener una junta de colocación entre piezas contiguas y rellenarla utilizando un material de rejuntado específico para casa uso. Respetar las juntas de movimiento previstas.

B. Limpieza inicial

Tras la instalación de las piezas, realizar una limpieza final de obra, con el fin de eliminar los restos cementosos que puedan quedar en superficie.

ON CEMENT
A. Fitting duplo tiles
Fit the tiles using an adhesive that is suitable for porcelain, and apply according to the manufacturer's instructions. In order to achieve a uniform and compact surface, it is recommended that you use a double adhesion technique, particularly with paving tiles that will be subjected to heavy loads. Keep a fitting board between adjoining tiles and fill it with grout designed for the purpose. Respect the predicted movement of spaces.
B. Final cleaning
After installing the tiles, carry out a final clean of the finished work, in order to get rid of any cement waste that remains on the surface.

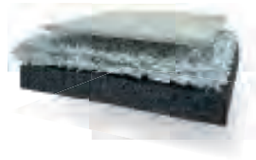

SOBRE GRAVA

A. Preparación del suelo

Se recomienda una base de, al menos, 10 cm de espesor de grava de grano mixto con una ligera pendiente para que desagüe.
Nivelar el terreno y aplanarlo antes de colocar una malla de tejido que impida el paso de vegetación, y, sobre la misma, un lecho de gravilla fina de otros 10 cm de espesor.
Nivelar el terreno con listón y martillo de goma.

B. Colocación de las piezas de duplo

Coloca las piezas Duplo cuidando de una buena planicidad del solado y una correcta alineación de las juntas, que deben tener 4 mm como mínimo.

ON GRAVEL
A. Preparing the ground
it is recommended to use a base of mixed grit gravel that is at least 10 cm thick and slightly sloping in order to aid drainage.
level the ground and flatten it out before placing a wire mesh over it that will prevent vegetation, and on top of that, place another fine bed of gravel that is 10cm thick.
level out the ground using a bar and rubber hammer.
B. Duplo tiles
fit the duplo tiles taking care to ensure the tiling is flat and that the spaces between tiles are correctly aligned, these should be at least 4mm.

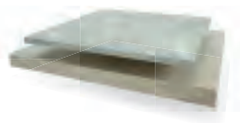

SOBRE ARENA

A. Preparación del suelo

Debemos disponer de una capa de arena de, al menos, 5-10 cm de espesor.
Compactar y nivelar el terreno con listón y martillo de goma.

B. Colocación de las piezas de duplo

Colocar directamente las piezas Duplo según la configuración deseada.
Compactar y nivelar de nuevo con listón y martillo de manera que la base del solado quede a la altura del terreno.

ON SAND
A. Preparing the ground
You should have a layer of sand that is at least 5-10cm thick.
Compress the tiles down and level out the ground with a bar and rubber hammer.
B. Fitting duplo tiles
Directly fit the Duplo tiles according to your preferred configuration.
Compress the tiles down and level them out again with a bar and hammer so that the base of the tiling is level with the ground.

Colorker no se hace responsable ante cualquier otro tipo de colocación.
Colorlker is not responsible for altemative methods used when installing this product.

1.PREPARACIÓN DEL SOPORTE

La colocación de baldosas cerámicas siempre debe ser realizada por personal profesional experimentado.
Deben elegirse las herramientas y útiles adecuados. **Las superficies, tanto de suelos como de paredes, deben estar perfectamente niveladas**, pudiéndose emplear morteros de regulación o nivelación, incluso capas impermeabilizadoras, de drenaje, etc, si la situación lo requiere. **Las superficies deben estar totalmente limpias antes de aplicar el mortero de agarre o el adhesivo.** Utilizar una adecuada iluminación, recomendándose la utilización de lámparas o focos para observar el ajuste dimensional.

PREPARATION FOR THE TILE SETTING

The laying of ceramic tiles must always be carried out by an experienced professional.

Always use the appropriate tool and equipment.

The surfaces, whether it be floors or walls, must be perfectly levelled.

For this purpose, a regulating or levelling mortar can be used, or even water-proofing or drainage layers, etc, if the situation requires it.

The surfaces must be completely clean before applying the mortar or the adhesive. Use adequate lighting, the use of lamps or spotlights is recommended in order to see clearly the dimensional alignment.

2. ELECCIÓN DEL ADHESIVO Y SISTEMA DE COLOCACIÓN

La elección del adhesivo viene definido por el tipo de baldosa cerámica (el grupo al que pertenece y el formato), por el tipo de la superficie a revestir (material) y por el uso del recinto.
La elección del sistema de colocación depende de la ubicación de la obra (exterior o interior) y de las dimensiones de la baldosa cerámica.
Se recomienda consultar con su distribuidor Colorker®.
Se recomienda una colocación en capa fina frente a la colocación en capa gruesa.
Se recomienda realizar doble encolado para baldosas que tengan alguno de sus lados con una longitud superior a 30 cm. Esta técnica se realiza aplicando adhesivo tanto en el soporte como en la baldosa, cubriendo toda la superficie de las mismas.

CHOICE OF ADHESIVE AND AND METHOD OF APLICATION

The choice of adhesive is defined by the type of ceramic tile (The group to which it belongs and its format), the type of surface lo be covered (material) and the purpose of the tiled area.

The choice of tiling method depends on the location of the site (outside or inside) and the dimensions of the ceramic tiles.

It is recommended to contact the dealer and to follow the instructions of the manufacturer.

It is recommended to use a fine layer as opposed to a generous one.

It is recommended to use double the adhesive with those tiles which have one or more sides longer than 30cm. This technique is achieved by placing adhesive both on the tile setter and on the tile, completely covering their surface.

3. CUIDADOS ESPECIALES DURANTE LA COLOCACIÓN

Utilizar crucetas o estrellas de tamaño adecuado según la junta para mantener la ortogonalidad del montaje.
En colocaciones trabadas o a contrapunta se recomienda que esta no supere el 15% de la longitud del lado más largo.
Comprobar el material ya colocado cuando el adhesivo está todavía fraguando con el fin de corregir pequeñas variaciones.

SPECIAL CARE DURING SETTING

Use crosses or stars of the appropriate size according to the joint, in order to maintain the orthogonality of the setting.

If to be set in a brickwork style or al a counterpoint, it is recommended not to surpass 15% of the longest side.

Check the material applied while the adhesive is still setting, in order to correct small variations.

4. EL REJUNTADO

Las juntas son un elemento necesario para la conservación de las instalaciones.
Existen varios tipos de juntas en una obra:
A. Juntas estructurales:
Están diseñadas para absorber los movimientos de la edificación y siempre deben respetarse. Pueden ser tapadas con perfiles adecuados y llenadas con materiales indicados.
B. Juntas perimetrales:
En todas las uniones pared-suelo. El ancho mínimo será de 8 mm. y deben de estar vacías o rellenas con material deformable. Son disimulables con el rodapié o el azulejo de pared.
C. Juntas de colocación:
Es la separación que se deja entre las baldosas. Se considera colocación con junta cuando la separación es mayor o igual de 1,5 mm, y separación sin junta cuando es menor de 1,5 mm, debiendo dejar siempre una separación mínima de 1,5 mm.
Antes de iniciar el rejuntado, esperar que el mortero de agarre o el adhesivo este totalmente endurecido.
Las juntas tienen que estar limpias y exentas de polvo y partículas.
Efectuar el rellenado o sellado de las juntas utilizando una llana de goma dura, sin dejar vacíos los desniveles.
Eliminar el exceso de junta de la superficie moviendo la llana diagonalmente a las juntas, cuando la mezcla

este todavía fresca.
Retirar los residuos con la misma espátula.
Es importante consultar con el distribuidor para elegir la junta adecuada al tipo de baldosa y el color que se quiera utilizar por estética.
Siga siempre las indicaciones de su distribuidor Colorker®.

GROUTING

The joints are a necessary element for the conservation of the premises.
There are various types of joints in a site:
A. Structual Joints:
These are designed to absorb movements in the building and musl always be respecled.
They can be covered with adequate profiles and filled with the indicated materials.
B. Perimeter Joints:
All joints where the wall meets the floor. The minimum width will be 8mm and must be empty or filled with a deformable material. They can be concealed with the skirting board or the wall tile.
C. Setting Joints:
These are the spaces lefl between tiles.The setting will be considered to have a joint when the space between each ti le is greater than or equal to 1.5 mm. For spaces of less than 1.5 mm, there is considered to be no joint. There should always be a minimum gap of at least 1.5 mm.
Before starting to apply the grout around the tiles, ensure that the mortar or adhesive is complelely hard.
The joints must be completely clean and free from dust and particles.
Refill or seal the joints with grout using a grout float of hard rubber, without leaving spaces or uneven levels.
Remove any excess grout from the surface by moving the grout float in a motion diagonal to the joints, while the mixture is still fresh. Remove any residue with the same spalula. It is important to consult the dealer when choosing the grout that is adequate for the tile and the colour that is the most aesthetically appealing. Always follow the instructions of the manufacturer.

5. TERMINACIÓN DE LA OBRA

Una obra no está acabada hasta que no está entregada.
Limpieza de las juntas:
Respetando los tiempos del fabricante, limpiar con un trapo de hilo húmedo loda la superficie, incluido el rejuntado. Al secar puede quedar una capa o velo en toda la superficie, que puede ser limpiada con agua. No dejar pasar mucho tiempo para limpiar los restos de juntas.
Limpiar los restos de obra con productos adecuados.
Consultar con el distribuidor y nunca emplear productos que contengan Ácido Fluorhídrico HF.
Protección de las superficies realizadas para evitar impactos, abrasiones, etc.

El mantenimiento de las baldosas cerámicas es sencillo y cómodo.
Se pueden emplear productos especflicos para cada tipo de baldosas respetando las indicaciones del fabricante de productos.
Consulte con el distribuidor.
Se aconseja al colocar, mezclar piezas de varias cajas. Verificar antes de colocar: Tonalidad, Calibre y Clase. No se admiten reclamaciones referentes al material colocado.

FINISH THE JOB

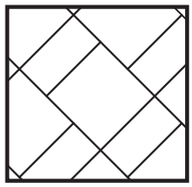

The job is not over until it has been fully completed.
Cleaning the joints:
Respect the times advised by the manufacturer, clean the whole surface with a damp linen cloth, including the grout.
When drying there may appear a veil or coating on the surface, this can be cleaned with water.
Do not wait too long before cleaning the remaining joints.
Clean the rest if site with the appropiate products.
Contact the dealer and never use products that contain Hydroflouric Acid HF.
Protect the surfaces already set against impacts, abrasions, etc.
Maintenance of ceramic tiles is easy and convenient. Specific producls can be employed for each type of tile. Carefully follow the instructions of both the manufacturer of the tiles and the manufacturer of the products.Contact the dealer for advice.
It is advised on having placed to mix pieces of several boxes. To check before placing the tonality, the calibre and the class. Are not admitted claims relating to the placed material.

5. COMBINACIÓN DE FORMATOS:

A continuación recomendamos un ejemplo para combinar los formatos 60 x 60 y 30 x 60. También mostramos el porcentaje de piezas necesarias.

EXAMPLES OF SIZE COMBINATIONS:

Hereunder we recommend you an example of 60 x 60 and 30 x 60 sizes combinations showing the percentage of pieces needed.

VARIOS / VARIOUS
(60 x 60 + 30 x 60)

- 60 x 60 = 67%
- 30 x 60 = 33%

(*) Recomendado junta de 5 mm.
It is recommended to install with 5 mm joint
